

# JDV projects.

Experience the JDV difference for a seamless healthcare fitout and refurbishment of your specialist suite.

We're here to simplify the journey, from start to finish.

For over  
**25+**  
years.

Exceptional Projects • Enduring Relationships

“We are so grateful for your patience throughout all the hurdles in finding the right space and transforming our rooms into exactly what we had envisioned. The process was efficient, and the standard of build exceptional. Nothing was too much trouble and communication amongst all members of your team faultless.”

St George Oncology Associates

**Our team has experience transforming medical facilities and specialist suites, guaranteeing a seamless and stress-free process from initial design to the final construction phase.**

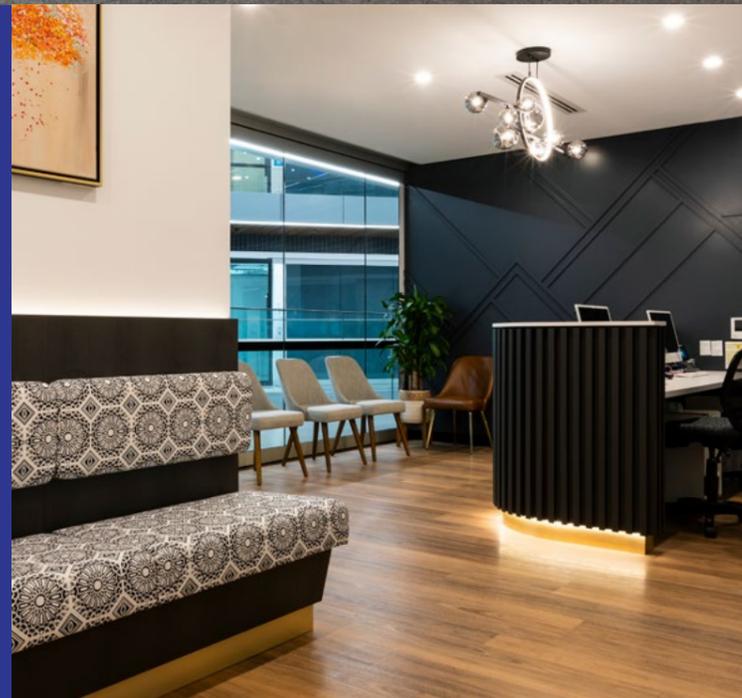

We recognise that a well-designed and functional environment is vital for improving patient outcomes, staff well-being, and overall quality of care.

We prioritise creating environments that promote positive patient experiences and enhance the well-being of your practice team. Our designs incorporate natural light, soothing colours, and comfortable furnishings to create calming spaces for patients.

Additionally, we focus on ergonomically sound workspaces and supportive staff areas to ensure your team operates in a conducive and efficient environment.

We understand the challenges of working within occupied facilities and prioritise minimising disruptions for all stakeholders. Our experienced project managers and site teams work diligently to ensure a smooth and positive journey for our clients throughout the project and beyond.

Orthopaedic, Obstetricians, Gynaecologists, Cardiothoracic, Urologists, Oncology, General Practice, Gastroenterologists, Rheumatologists, Cardiologist, Spinal, Vascular & Endovascular, Allied Health & Pharmacy.

Contact us today without obligation for a complimentary space analysis and test fit.

We have completed projects in

### 1. Discovery

Consulting with you and your team, we gain insights into your new practice requirements, challenges and aspirations and how to accommodate these within your defined budget.

### 2. Define

Review your practice objectives, cultural considerations, and space requirements. Partnering with you to review potential sites or review existing premises.

### 3. Conceptualise

Ideation and Visualisation through Design, Budget and Cost Objectives to create a Project Road map.

### 4. Design Development

Design Exploration and prototype of the project with mood boards & 3D modeling and all necessary approvals

### 5. Innovations

Working with you to value engineer and cost the project vs functionality. Collaborating and identifying industry partners and your delivery team.

### 6. Project Delivery

Construction begins with your dedicated and experienced team of JDV Project Managers and Site Managers to manage logistics and delivery.

### 7. Post Project

Management of ongoing Maintenance and repair, warranties and training. We remain close and available with ongoing works and churn projects.

“JDV managed our project effectively, efficiently and professionally, achieving a fabulous outcome for our group. They have that rare “can do” attitude and I cannot recommend them highly enough. It was a big project handled professionally in every way. Thank you JDV!”

Jenny Slatyer, Business Manager  
 Peninsula Orthopaedics & Sports Medicine
