ENVIRONMENTAL MANAGEMENT POLICY

JDV Projects is committed to operating in a manner that is compatible with the long-term sustainability of the ecosystems which we affect. Environmental stewardship is one of our core organisational objectives and the responsibility of all of our workers.

We believe that sound environmental performance is a key component of sound business performance, and as such, it represents a value-added benefit to our community.

Our commitment is evidenced by the adoption of ISO 14001:2015 - Environment Management Systems as the basis for our environmental management. We are committed to conforming to the requirements of the Standard and to our systems. JDV Projects sustains a program of continuous improvement. This is achieved and supported by:

- Our commitment to prevention of pollution at all times;
- Complying with all applicable environmental laws and regulations, and any other relevant requirements, including client and industry imposed requirements;
- Managing our operations to avoid or minimise impacts to the environment;
- Identifying environmental objectives and targets, which represent performance beyond strict regulatory compliance, and striving to meet or exceed them;
- Monitoring our environmental performance through regular evaluations and reset targets and objectives periodically;
- Reducing the quantity and toxicity of materials used and waste generated from our operations through on-site recycling, off-site recycling or licensed disposal;
- Promoting our superior environmental performance to maximise strategic business advantages where applicable;
- Considering environmental costs, risks, and impacts when making planning, contracting, purchasing, and operating decisions;
- Seeking the commitment of all workers to environmental stewardship through communication, training and support for leadership; and
- Involving our employees and sub-contractors in improving our environmental performance

Jason DeVos

Managing Director.
