**Environmental
Management.**

Environmental Management

We embrace sustainability and sound environmental choices at every stage of a project cycle, including our own head office operation. Our commitment is evidenced by the adoption of **ISO 14001:2015 - Environment Management Systems** as the basis for our environmental management and sustainability activities.

In addition to our Environmental responsibility, we ensure that we discuss and advise clients on sustainability options when delivering a fitout. These include initiatives such as sensor activated lighting, regular waste audits for water, energy and recycling as well as providing the best of in-house technology for video conferencing to avoid unnecessary travel.

During our construction, we are committed to responsible material sourcing and recycling and make a conscious effort to separate and minimise waste followed by responsible waste disposal.

Policies, processes, practices and performance

We believe that sound environmental performance is a key component of sound business performance, and as such, it represents a value-added benefit to our community.

JDV Projects sustains a program of continuous improvement.

This is achieved and supported by:

- Our commitment to prevention of pollution at all times,
- Complying with all applicable environmental laws and regulations, and any other relevant requirements, including client and industry imposed requirements;
- Managing our operations to avoid or minimise impacts to the environment;
- Identifying environmental objectives and targets, which represent performance beyond strict regulatory compliance, and striving to meet or exceed them;
- Monitoring our environmental performance through regular evaluations and reset targets and objectives periodically;
- Reducing the quantity and toxicity of materials used and waste generated from our operations through on-site recycling, off-site recycling or licensed disposal;
- Promoting our superior environmental performance to maximise strategic business advantages where applicable;
- Considering environmental costs, risks, and impacts when making planning, contracting, purchasing, and operating decisions;
- Seeking the commitment of all workers to environmental stewardship through communication, training and support for leadership
- Involving our employees and sub-contractors in improving our environmental performance.

CERTIFICATE OF REGISTRATION

THIS IS TO CERTIFY THAT

JDV Management Pty Ltd T/A JDV Projects
